Average Retail Price by Product Type

Price vs. Discount Correlation

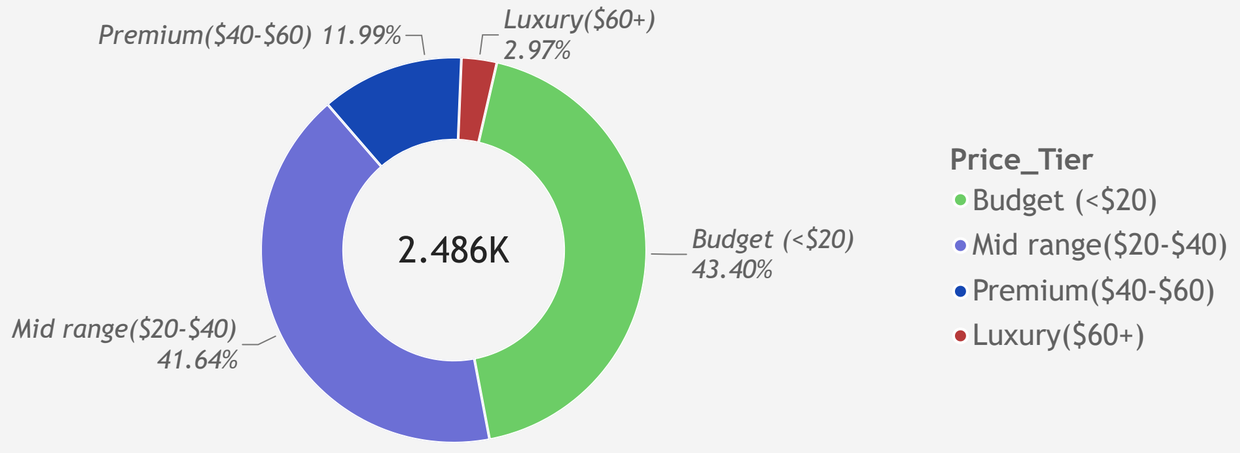

Deepest Discounts by Product Type

Notice the cluster of items around $10-$20 with 60-70% discounts. This indicates a heavy liquidation strategy on low-ticket accessories and basics.

Executive Insight: The model predicts that 24% of our currently in-stock items (2,782 SKUs) are at high risk of selling out. Core apparel categories like T-Shirts and Leggings show the highest risk (90%+). Recommendation: Prioritize manufacturing and restocking these specific items immediately to capture lost revenue.
